LEOPARD DYNASTY – THE RISE OF RANA

52' (ENG, GER) 

A young leopard fights to secure his place in Jhalana's territory, even if it means facing off against his own father.

Jhalana's refuge, India's urban leopard habitat, is controlled by the strong and experienced Bahadur. But his dominance is being challenged – by his son, Rana! Once a quiet youngster, Rana has grown into an ambitious young male. But in the animal kingdom, power is not inherited – it is fought for with strength and persistence. Rana is not content with just securing his place; he wants more. To fulfill his ambitions, he forms a bond with one of his father's females, and what begins as a simple interaction soon turns into a powerful partnership. The aging Bahadur has held his territory for six years and will not tolerate his son's claim. Rana faces a decision: retreat or fight. But Rana follows his instincts.
